According to Regulation (EU) Nr. 65/2014 / Nach Verordnung (EU) Nr. 65/2014																																																							
Brand																																																							
Model	PE160																																																						
Annual Energy Consumption (AEC _{hood})(kWh/a)	31.1																																																						
Energy Efficiency class (E to A++)	C																																																						
Fluid Dynamic Efficiency (FDE _{hood})	11.7																																																						
Fluid Dynamic Efficiency Class	E																																																						
Lighting Efficiency (LE _{hood})(lux/W)	46																																																						
Lighting Efficiency Class	A																																																						
Grease Filtering Efficiency (in %)	62.6																																																						
Grease Filtering Efficiency Class	E																																																						
Air flow by working points lowest setting (m³/h)	179.6																																																						
Air flow by working points highest setting (m³/h)	319.6																																																						
maximum airflow Qmax (m³/h)	326.9																																																						
A- weighted airborne noise emissions in normal operation at minimum speed (dB)	51																																																						
A- weighted airborne noise emissions in normal operation maximum speed (dB)	62																																																						
A- weighted airborne noise emission in the intensive or boost speed (dB)	-																																																						
power consumption in off mode (P _o) (Watt)	0																																																						
power consumption in standby mode (P _s) (Watt)	-																																																						
Additional Product Information compliant to commission regulation (EU) Nr. 66/2014																																																							
Time increase factor (f)	1.6																																																						
Energy efficiency index (EEI _{hood})	70.2																																																						
Measured air flow rate at best efficiency point (Q BEP) (m³/h)	173.7																																																						
Measured air pressure at the best efficiency point (PBEP) (Pa)	123																																																						
Measured electric power input at best efficiency point (WBEP) (Watt)	50.8																																																						
Nominal power of the lighting system (WL) (Watt)	2																																																						
Average illumination of the lighting system on the cooking surface (E middle) (lux)	92
