Brand																																																							
Model	SJ 3602-60 SR																																																						
Annual Energy Consumption (AEC _{hood})(kWh/a)	8.1																																																						
Energy Efficiency class (E to A++)	A+++																																																						
Fluid Dynamic Efficiency (FDE _{hood})	33.7																																																						
Fluid Dynamic Efficiency Class	A																																																						
Lighting Efficiency (LE _{hood})(lux/W)	35																																																						
Lighting Efficiency Class	A																																																						
Grease Filtering Efficiency (in %)	73.6																																																						
Grease Filtering Efficiency Class	D																																																						
Air flow by working points lowest setting (m³/h)	217.9																																																						
Air flow by working points highest setting (m³/h)	501.1																																																						
maximum airflow Qmax (m³/h)	753.6																																																						
A- weighted airborne noise emissions in normal operation at minimum speed (dB)	39																																																						
A- weighted airborne noise emissions in normal operation maximum speed (dB)	59																																																						
A- weighted airborne noise emission in the intensive or boost speed (dB)	62																																																						
power consumption in off mode (P _o) (Watt)	0.28																																																						
power consumption in standby mode (P _s) (Watt)	-																																																						
Additional Product Information compliant to commission regulation (EU) Nr. 66/2014																																																							
Time increase factor (f)	0.8																																																						
Energy efficiency index (EEI _{hood})	28.8																																																						
Measured air flow rate at best efficiency point (Q BEP) (m³/h)	252.8																																																						
Measured air pressure at the best efficiency point (PBEP) (Pa)	97																																																						
Measured electric power input at best efficiency point (WBEP) (Watt)	20.2																																																						
Nominal power of the lighting system (WL) (Watt)	3																																																						
Average illumination of the lighting system on the cooking surface (E middle) (lux)	104
